Summary:

Software developer with expertise in front-end development, javascript and javascript based frameworks, with additional proficiency in backend development within the same ecosystem when required.

Technical Skills:

- **Frontend** - HTML, CSS, Javascript, Vue.js, Vuex, React.js, Redux, React Native.
- **Backend** - Node.js, Express.js, Firebase, Supabase, Flask.
- **Database** - MongoDB
- **Misc** - Git, SVN, SonarQube, jqGrid, AGgrid, Element Plus, Bootstrap, Highcharts.

Experience:

Software Engineer - Dassault Systemes | Dec 2021 - Present

- UI Software Engineering Specialist responsible for responsive and cross-platform UI development for sales projects.
- Developed feature-rich grids incorporating custom components for column implementations, encompassing controllers, inline editing, and mass editing functionalities.
- Successfully migrated legacy UI code from Vue 2 to Vue 3 and from Element UI to Element Plus. Additionally, implemented dynamic chart creation directly from tables on the UI, integrating annotation features seamlessly.

Full stack developer - Newton School | April 2021 - Sep 2021

- Completed an internship with a focus on full stack development.
- Proficient in Java programming and problem-solving with Data Structures and Algorithms (DSA).
- Acquired skills in the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Participated in frontend projects involving JavaScript, React, CSS, and HTML

Projects:

CallerAi - [Demo Link](#) | Freelancing

- **Tech stack** - Vue.js, Vuex, Element Plus, Axios, Flask, OpenAI, Twilio, ElevenLabs
- Developed an AI caller bot project capable of managing both inbound and outbound calls.
- Leveraged Twilio's APIs for call functionalities alongside transcription and text-to-speech APIs.
- Utilized OpenAI's APIs to generate conversational interactions within the bot.

Sales Compensation App - Dassault Systemes

- **Tech stack** - JavaScript, RequireJS, HTML, CSS, SASS, Vue.js, jQuery, Element Plus Grid, jqGrid, AG-Grid, Highcharts.
- Enterprise application for calculating the compensation of a sales person and monitoring the performance by creating the grids, charts and excel reports on UI.

Client Repository - Dassault Systemes

- **Tech Stack** - HTML, CSS, Vue.js, Element Plus Grid, Highcharts.
- Created a grid acting as a central repository for client details, facilitating data management for sales efforts. Stores comprehensive client data
- Created multiple custom views for different KPIs aiding sales personnel in identifying and contacting clients.

Education:

Bachelor of Technology - July 2015 - May 2019

- Electronics and Communication Engineering | Bundelkhand University Jhansi
