Acquired skills in the MERN stack (MongoDB, Express.js, React.js, Node.js).  
Actively participated in frontend projects involving JavaScript, React, CSS, and HTML.

## Projects

---

- CallerAi**  
I'm currently working on a personal project involving the creation of an AI caller bot. This bot is designed to handle both inbound and outbound calls, utilizing APIs from Twilio, ChatGPT, and Eleven Labs. My current efforts are directed towards developing the frontend of this project, leveraging Vue.js and Element Plus. As for the backend, I intend to implement it using Django.
